65" 4K Android Freestanding Digital Posters

Show-stopping digital advertising totems with giant tablet styling

Commanding Giant Monolith

The thicker robust enclosure, tempered glass face, rounded corners, aluminium surround and classic piano black colour give an attractive colossal tablet-like aesthetic. They also protect the internal components from potential damage in public spaces.

Remarkable 4K Display

With four times the resolution of Full HD you can achieve a truly immersive experience with an incredible image quality. 4K content can be displayed via USB plug and play, via our CMS My Signage Portal, third party Android software or by using third-party devices via the HDMI input, giving you ultimate flexibility.

Features
- 24/7 Commercial Use
- Internal Locker/AV Inputs
- 450cd/m² IPS Panel
- Integrated Castors
- Free Scheduling Software
- Low Power Consumption
- 3-Year Warranty
- Lifetime Tech Support

Integrated 4K Android Media Player

The built-in Android media player allows you to easily run and update on-screen content via a website, our own online CMS platform or any other compatible third-party software.

Internal Locker

Having a lockable compartment in the rear of the display with space to fit a small PC or media player means running the screen from an external source is easy – simply use the 4K HDMI or VGA and 5mm audio inputs. This device can be powered from inside the locker with no need for additional power cables.

450cd/m² IPS Panel

Commercial grade IPS technology ensures incredible image quality and colour depth with no fall-off in colour accuracy, as well as achieving ultimate lifelike colour from an ultra-wide viewing angle in portrait orientation.

Easy Manoeuvrability

Thanks to the integrated castors and recessed rear handles, these displays offer a portable solution that can be easily be moved around. For more permanent installations, the retractable feet can be used to keep the display in place.

24/7 Commercial Grade

Designed for continuous use in public spaces, these displays utilise commercial grade LCD panels, LED backlights and internal components. This means they can run 24/7 for over 70,000 hours. To avoid tampering, they also have no external buttons or controls.

Built-In Speakers

Take your digital signage solution to the next level by adding an audio element using the two integrated slimline speakers.

Power Timer

The eco-friendly power timer allows you to assign daily or weekly on and off times for your screen meaning that it is only in use when it needs to be; improving your environmental efficiency.

Free Scheduling Software

These displays come with free scheduling software for displaying different content at different times of the day. If you prefer to keep it simple you can update the screen directly without using the software.
